SEMBOX DSM 2009

**DIGITALER SATELLIT METER
Problem: DSM2009 no response**

V 1.0

Please note the following notice:

Please charge up the DSM2009, or use it with the power adapter, during the firmware update. If the update process cancels before they is finished, the DSM2009 device can be damaged.

Problem:

After turn on the DSM2009, only the logo appears. The DSM2009 device doesn't response to any input.

Solution:

1. Upgrade the DSM2009 with Hyper Terminal, the firmware version 1.96. For more information, how the upgrade works load this manual: [Firmware Update](#)

2. Turn off the DSM2009 after the upgrade process.

3. Push and hold the ON button and after approx. ½ seconds press also the F1 button and hold until the Menu from the DSM2009 appears.

The period between push down and holt the ON button and the F1 button is important. Try repeatdly point 3., if it doesn't works on the first try.
