

How to upgrade the latest bootloader via USB memory stick:

1) Download the bootloader ini-3000/ini-5000/ini-7000 file

Download (ini-3000) UNiBOX HD1:

<http://multikomforum.de/dordner/index.php?dir=Receiver/UNiBOX%20HD1/>

Download (ini-5000) UNiBOX HD2:

<http://multikomforum.de/dordner/index.php?dir=Receiver/UNiBOX%20HD2/>

Download (ini-7000) UNiBOX HD3:

<http://multikomforum.de/dordner/index.php?dir=Receiver/UNiBOX%20HD3/>

2) Unzip the downloaded file then 'ini-3000' / 'ini-5000' / 'ini-7000' folder will appear

3) Copy that folder into the USB Medium

Insert USB medium into USB sockets on the rear panel.

Power Off and Power On through the powerswitch at the rear panel of the box.

The upgrade process starts automatically. The upgrade process can be seen in the VDF display.

If the upgrade process is successful, you can see on the VFD display the message:

"Complete"

Now you can disconnect the USB drive from the device and restart the device.
